Public Notice to Boil Water

Due to operational problems, the Water Treatment Plant was not able to deliver water to the system last night towards the evening hours of July 7, 2015. The water system pressure has been restored and is currently in normal operating condition. The Texas Commission on Environmental Quality (TCEQ) has required our water system City of Weslaco Water Treatment Plant, PWS ID# 1080011 to notify customers of the need to boil their water prior to consumption.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes. In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption. Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact the Weslaco Public Utilities Department Office at 956 968-3181.
